Profile Summary

Dedicated Computer Science engineer specializing in cybersecurity with extensive hands-on experience in malware analysis and reverse engineering. Proven track record in CTF competitions, security auditing, and vulnerability research. Combines strong analytical skills with deep understanding of security threats and defensive strategies to protect digital infrastructure.

Education

École supérieure en Sciences et Technologies de l'Informatique et du Numérique (ESTIN) 2021 – 2026
Engineering Degree in Computer Science & Cybersecurity Béjaïa, Algeria
Specialization: Cybersecurity

Engineering Thesis Project

Building a Smart DFIR Platform Using Velociraptor, Elastic, and a Secured LLM Assistant for Evidence Analysis and Correlation 2025 – 2026
ESTIN, Béjaïa, in a six-month internship at Air Algérie – Co-authored, Engineer's Degree Dissertation

- Designed and deployed (via containerized Docker Compose on a cloud VPS) a DFIR platform combining Velociraptor for endpoint forensic collection, the Elastic Stack for log ingestion/correlation, and a fine-tuned LLM assistant (qwen25-dfir) with a Retrieval-Augmented Generation (RAG) pipeline
- Built a four-stage prompt-injection classifier protecting the LLM endpoint, blocking 100% of tested adversarial prompts, including six that bypassed LLM-level refusal
- Benchmarked against 8 Caldera-emulated MITRE ATT&CK techniques vs. Wazuh and Splunk: 100% detection rate, mean time-to-detect (MTTD) of 23.5s; fine-tuning improved mean DFIR quality with no regression across all 8 task categories

Professional Experience

Cybersecurity Engineering Intern, Air Algérie Feb. 2026 – Jul. 2026
Six-month engineering thesis internship

- Designed and built the Smart DFIR platform above for security operations use, shaped by real-world network infrastructure constraints under the mentorship of an Air Algérie cybersecurity engineer
- Validated detection end to end with MITRE Caldera adversary emulation and a 25-prompt adversarial corpus against the LLM assistant

Cybersecurity Audit, ESTIN Nov. 2024 – Jun. 2025
Information Security Department

- Conducted comprehensive security audits of Linux servers and computer lab machines
- Performed vulnerability assessments and penetration testing on critical infrastructure
- Developed security recommendations and implemented hardening measures for educational environments
- Documented security findings and provided remediation strategies to improve overall security posture

Network Engineering Intern, Algérie Télécom Jul. 2024 – Aug. 2024
Network Infrastructure Department

- Participated in telecommunications network infrastructure installation and deployment projects
- Assisted in the configuration and setup of network equipment including routers, switches, and transmission systems
- Gained hands-on experience with fiber optic cable installation and network hardware implementation
- Learned about network architecture planning and infrastructure maintenance procedures

Cybersecurity Training & Programs

Positive Hack Camp, Moscow, Russia Jul. 2025 – Aug. 2025

- Successfully completed the White Hat Hacker formation program
- Placed 2nd in the internal competition among program participants
- Gained advanced knowledge in ethical hacking methodologies and security testing

GraySwan AI Red Teaming: Machine in the Middle 2025

- Participated in AI red teaming competition focused on adversarial machine learning

- Achieved Top 14 placement among global participants
- Developed skills in AI security, model vulnerabilities, and adversarial attacks
- **GraySwan Profile:** app.grayswan.ai/arena/user/68921c18f2f6e6cdecf70030

Cybersecurity Projects & Achievements

CTF Competition Success 2022 – Present
- **Challenge Author:** Created challenges for Nexus and NexZero CTF events, testing various cybersecurity skills
- **National Competitions:** Achieved 1st and 2nd place in multiple national events (shellmates HACK.INI, pwnycup)
- **HackFest Finals (Tunisia):** Placed 4th in the international finals competition
- **International Recognition:** 9th place in TryHackMe CTF among thousands of global competitors

Malware Analysis & Sandbox Development 2022 – Present
- Reverse-engineered notable malware samples (e.g., WannaCry, various RATs) to study C2 mechanisms, persistence, and evasion techniques
- Built a custom sandbox for static/dynamic analysis with automated behavior reporting and detection

Cybersecurity Workshop Facilitator 2022 – Present
- Conducted regular training sessions on reverse engineering and malware analysis
- Mentored junior members in vulnerability research and exploitation techniques
- Developed educational materials and hands-on exercises for cybersecurity learning

Web Development Projects

Full-Stack Development 2022 – Present
- Designed and implemented e-commerce platforms with secure payment integration
- Built real-time chat application with secure authentication, message encryption, and WebSocket technology
- Developed basketball team management system with scheduling and statistics features
- Developed and deployed an Aesthetic doctor website and dashboard drboudabiawafa.com

Technical Skills

Cybersecurity:
- **Malware Analysis:** Static & dynamic analysis, reverse engineering, behavior analysis
- **Penetration Testing:** Vulnerability assessment, exploitation, security auditing
- **AI Security:** Adversarial machine learning, model vulnerabilities, red teaming
- **Tools:** Ghidra, IDA Pro, Wireshark, Nmap, Metasploit, Burp Suite
- **Assembly:** x86/x64 assembly language, debugging, binary analysis

Programming & Development:
- **Languages:** JavaScript, Python, C, C++, Assembly
- **Web Technologies:** HTML5, CSS3, React.js, Next.js, Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Tools:** Git, Docker, Socket.io, RESTful APIs

Systems & Networks:
- **Network Security:** Traffic analysis, firewall configuration, IDS/IPS
- **Virtualization:** VMware, VirtualBox, Docker containers

Certifications & Achievements

- **Certified Ethical White Hacker (CEWH)** — CyberED (2025)
- **Cyber Security and Adversarial Analysis (C3SA)** — CyberWarfareLabs
- **TryHackMe Profile:** Top 2% globally — tryhackme.com/p/samdem
- **Root-Me Profile:** — root-me.org/samdem
- **Security Research:** Published vulnerability research and contributed to security community knowledge

Languages

Arabic — Native proficiency
French — Fluent
English — IELTS 8.0/9.0 (C1)
